

Day-19(this, object , methods , properties)

Monday, 25 September 2023 7:54 PM

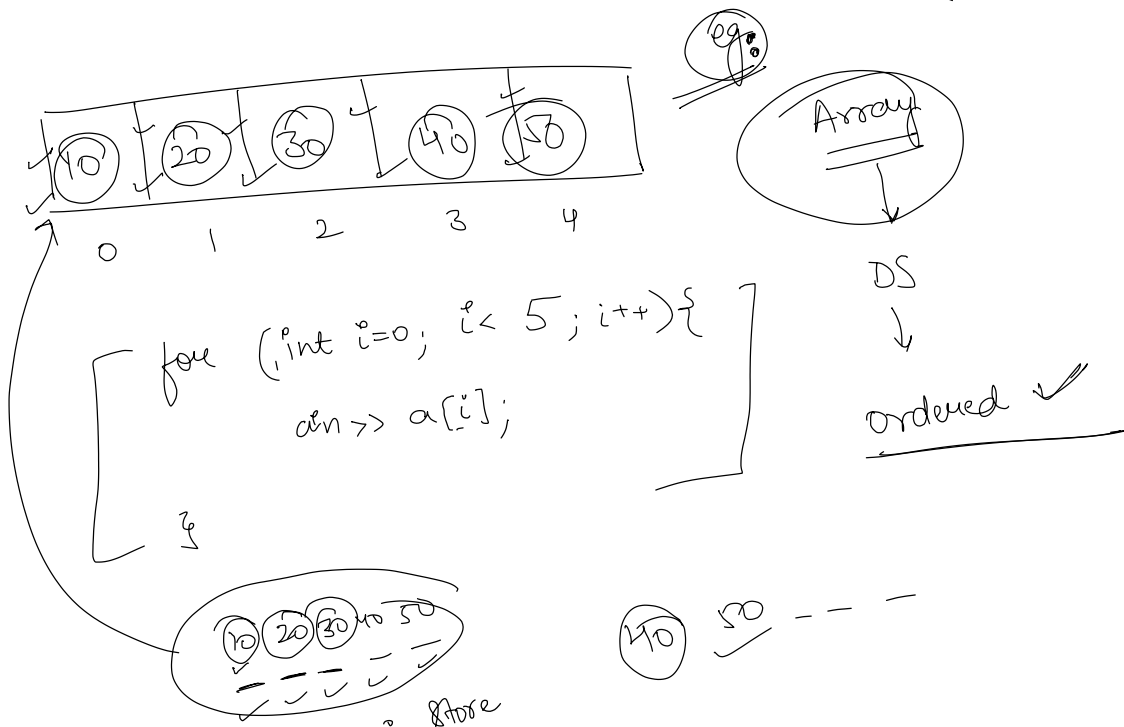

Object

→ JS objects are used to group up

similar
eg: todo → title → gym/grocery/study
completed → Y/N

→ Yes (DS) → unordered
(ordering X)
(matter)

→ usi farq me
bhi haingi,

Objects → DS → unordered (order ~~is~~)

Let todo = { } khatam

function: →

```
function sam(){  
}
```

Object: → Let todo = { }

↳ deep dive

_____ = {

properties
↓

{

}

key-value pair

eg:

Let person = {
 key: value
 P₁ → name: "Samarth"
 P₂ → age: 29
}

properties ← Object
↓
...

Key: value

L S

→ Numbers are superflexible

String → bts → keys are stored as
Number → (strings)
↓
directly
access

— X — X — X —

? properties → ?
only
Key-value
methods

type 1 (this) → this keyword points to the object when referred in the method
