

Day-26(class , prototypes , dender proto , constructor fuction)

Friday, 13 October 2023 7:49 PM

prototypes **

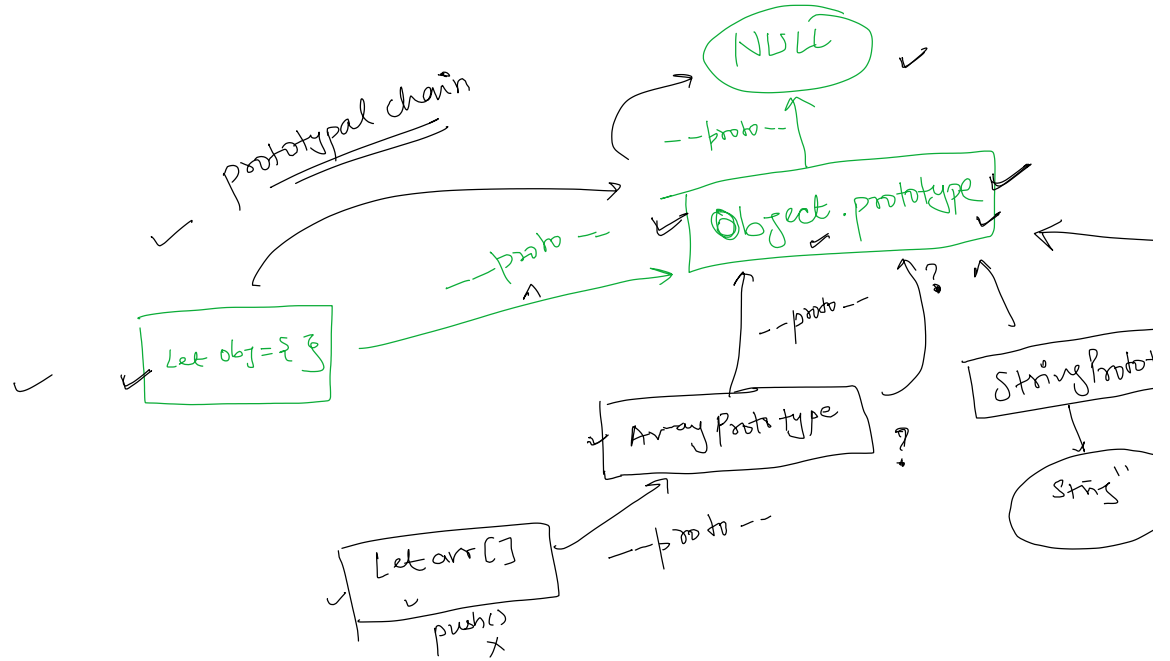

object \Rightarrow Let sam = { ... }
 Let hadin = { }

fallback source

Object.prototype

prototype = --proto--

Important

EVERYTHING
 INSIDE JS
 IS AN
 OBJECT

obj

methods

Push(), Pop()

Let arr = ["hai", "hu", "Na"];

① ② ③

method? \rightarrow object ka func

arr = ["My", "name", "is"]

--proto--

hazka obj → syntax -

easier way
or
another way
of writing code.

constructor funcⁿ
