

JQuery

JS library

helps in DOM manipulation

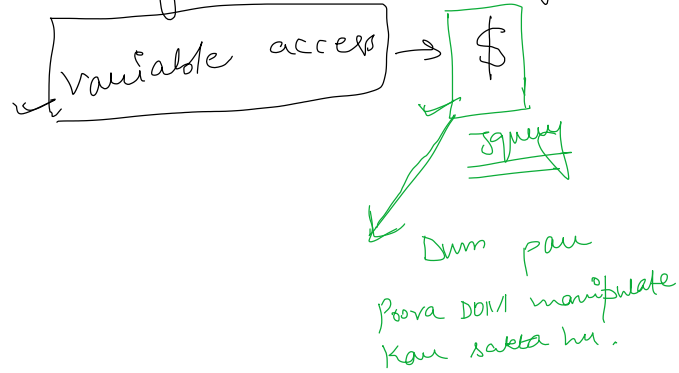

☑️ Same Kaam Karna Sakta hai jo hum DOM through.

→ Code (JS) Bata hai

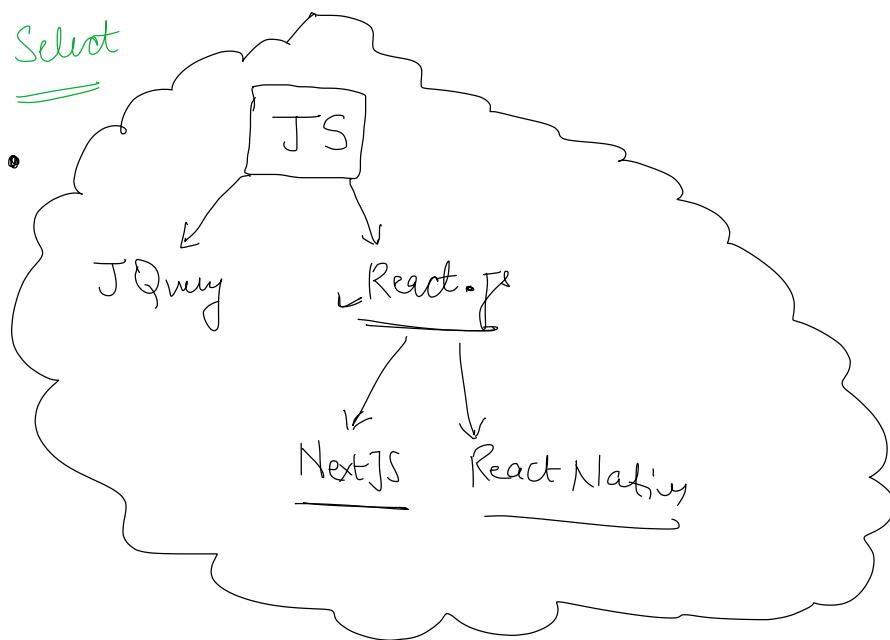

JQuery.com

when you include Jquery

JQuery or \$] same

JQuery # Select

JS → TS

#

let a = 10; → Number

~ 'Sam' → String

errorHandling

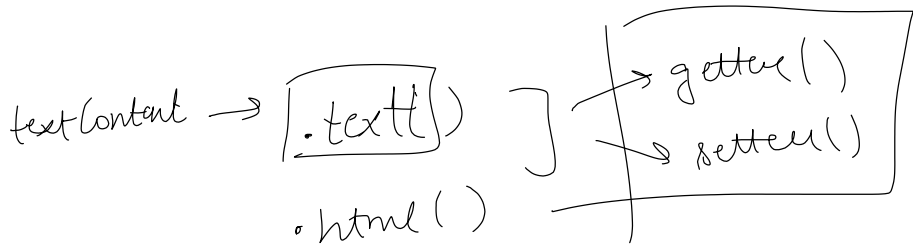

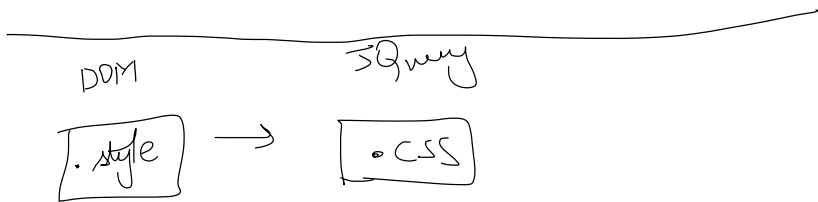

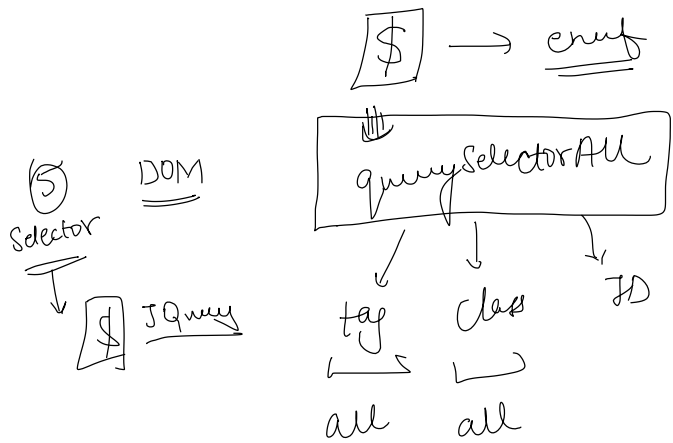

eg. TS

Let a; String = 10; ✓
a = 'Sam'; X
a = 2000; ✓

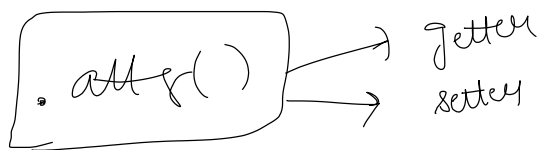

→ error handling
→ auto completion

X ————— X ————— X ————— X ————— X —————

Selecting Element

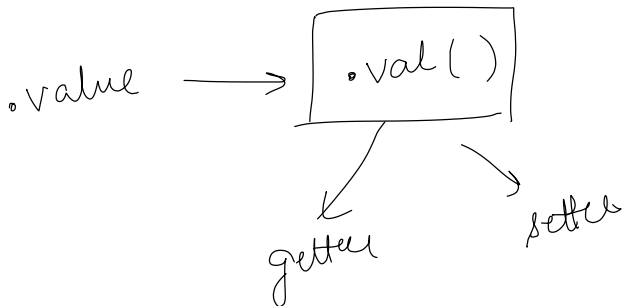

Attributes manipulate

docs: • Jquery.com → API docs
• you might not need Jquery.com

input manipulation

(always works with inputs)

class manipulation

- ✓ • `addClass()` →
- ✓ • `removeClass()` →
- ✓ • `toggleClass()` → toggle
- ✓ • `hasClass()` → contains

Library

- Iske code ko aap use krsktte ho.
- mai apne hisaab se chenge krsktta hu & I might have multiple ways to perform a task

Framework

- ye apke code ko apne upar use krsktta hai.
- framework gives me a fixed set of steps in order to perform a task.
